PART 5 – FORMS

5.1 Report of exempt distribution

(1) Requirement to file

An issuer that has distributed a security of its own issue under any of the prospectus exemptions listed in section 6.1 of NI 45-106 is required to file a report of exempt distribution, on or before the 10th day after the distribution. Alternatively, if an underwriter distributes securities acquired under section 2.33 of NI 45-106, either the issuer or the underwriter may complete and file the form. If there is a syndicate of underwriters, the lead underwriter may file the form on behalf of the syndicate or each underwriter may file a form relating to the portion of the distribution it was responsible for. In certain circumstances, two or more issuers distribute a single security. In these circumstances, only one report of exempt distribution is required to be filed for the distribution, which may be completed and filed by any one of the co-issuers. The required form of report is Form 45-106F1 *Report of Exempt Distribution*. In determining if it is required to file a report in a particular jurisdiction, the issuer or underwriter should consider the following questions:

- (a) Is there a distribution in the jurisdiction? (Please refer to the securities legislation and securities directions of the jurisdiction for guidance, if any, on when a distribution occurs in the jurisdiction.)
- (b) If there is a distribution in the jurisdiction, what exemption from the prospectus requirement is the issuer relying on for the distribution of the security?
- (c) Does the exemption referred to in paragraph (b) trigger a reporting requirement? (Reports of exempt distribution are required for distributions made in reliance on the prospectus exemptions listed in section 6.1 of NI 45-106, Multilateral Instrument 45-108 *Crowdfunding* and certain local rules and orders.

A distribution may occur in more than one jurisdiction. In this case, the issuer may complete a single report identifying all purchasers, and file the report in each Canadian jurisdiction where the distribution has occurred.
