

CSA Notice and Request for Comment Proposed Amendments to Multilateral Instrument 13-102 *System Fees*

November 21, 2024

Introduction

The Canadian Securities Administrators except the British Columbia Securities Commission (the **CSA** or **we**) are publishing for a 90-day comment period proposed amendments (the **Proposed Amendments**) to Multilateral Instrument 13-102 *System Fees* (**MI 13-102**)¹. The British Columbia Securities Commission is not publishing the proposed amendments and changes for comment at this time while it awaits necessary government approvals.

The text of the Proposed Amendments is contained in Annex A of this notice and will also be available on the websites of CSA jurisdictions, including:

Substance and Purpose

The CSA is proposing to introduce an updated system fee regime with annual increases in system fees over a 5-year period commencing late 2025. Under the Proposed Amendments:

- the total system fees collected by the CSA will increase,
- no new system fees are introduced,
- system fees remain established on a cost-recovery basis, and
- the flat-fee structure is retained.

¹ While the Manitoba Securities Commission is not a participant in MI 13-102, it is a participant in the system fee regime as a result of Regulation 158/2013 under *The Securities Act* (Manitoba). It is anticipated that the Proposed Amendments would be reflected in corresponding changes to Regulation 158/2013.

We note that system fees fund the costs of the technology systems shared by the CSA and its members and are separate from any regulatory or other fees a user may be required to pay in any province or territory.

Background

In 2013, MI 13-102 was adopted to replace the filing service charge schedules under the SEDAR Filer Manual and the NRD User Guide. On adopting MI 13-102, the CSA reduced some fee rates but retained the fee structure from the filing service charge schedules, which required fees to be paid to principal and non-principal regulators in differing amounts. These fee reductions were made in response to the underlying costs of operating the national systems having been reduced at that time.

In 2019, the CSA proposed that MI 13-102 be repealed and replaced so that the principal and non-principal regulator system fees could be replaced with flat fees per filing type paid only to a filer's principal regulator. This change simplified the system fee regime for filers and was implemented when SEDAR+ went live in July 2023. This change also removed system fees for certain filing types and introduced some new fees. The system fee changes under this new structure, combined with changes in filing patterns, reduced the annual system fee revenue by 18%. As a result, fiscal 2024 system fee revenue was less than the fiscal 2013 system fee revenue.

When this change was proposed in 2019, the accelerated growth in IT labour costs for both system development and operations (including SEDAR+), could not have been anticipated. From 2021 to 2024, the labour costs for IT services increased between 35% and 45%, outpacing costs growth in other sectors². These IT labour costs are expected to continue increasing at a steady pace over the next few years.

The CSA's experience with cost increases is consistent with external research³, which shows that IT costs have increased significantly across all industries in recent years due to several factors, including higher technology costs, higher cybersecurity risk mitigation costs and higher specialized labour costs.

Summary of the Proposed Amendments

The CSA is proposing to increase system fees to better align system fee revenues with projected national systems operating costs over the next 5 years.

To meet current national systems funding needs, the CSA is proposing a 60% system fee increase in November 2025 and 3% increases in each of the following four years. The proposed system fee increase will be less than \$2,500 for 95% of filing and registrant organizations and less than \$1,000 for 85% of filing and registrant organizations, in the first year.

The Gartner Labor Rate Tool provides rates for 30+ countries for a selection of IT services. It uses salary analysis, which sources salary data from 65,000 global sources including government salary data, job boards, and corporate sources to collect compensation data. North American parameters were used to assess labor rate increases.

These system fee increases are necessary to ensure sufficient funding to operate the CSA's national systems over those five years. Since system fees continue to be based on the type and number of filings submitted and the number of individual registrants, the proportional fee increases will equitably impact all market segments.

We are reviewing whether the CSA can develop and operate national systems more effectively and efficiently. As part of that review, the CSA is developing a long-term strategic plan for the national systems that considers use of the latest technology tools and alternative operating models.

Local Matters

Annex B is being published in any local jurisdiction that is making related changes to local securities laws, including local notices or other policy instruments in that jurisdiction. It also includes any additional information that is relevant to that jurisdiction only.
